NATIONAL FOREWORD

This Indian Standard (Part 6) which is identical with ISO 4033 : 1999 'Hexagon nuts, style 2 — Product grades A and B' issued by the International Organization for Standardization (ISO) was adopted by the Bureau of Indian Standards on the recommendation of the Bolts, Nuts and Fasteners Accessories Sectional Committee and approval of the Basic and Production Engineering Division Council.

The Committee decided to publish this standard as Part 6 of IS 1364. Thus, this Part 6 of IS 1364 will supersede IS/ISO 4033 : 1979 on its publication.

The text of ISO Standard has been approved as suitable for publication as Indian Standard without deviations. Certain terminology and conventions are, however, not identical to those used in Indian Standards. Attention is drawn especially to the following:

- a) Wherever the words 'International Standard' appear referring to this standard, they should be read as 'Indian Standard'.
- b) Comma (,) has been used as a decimal marker while in Indian Standards, the current practice is to use a point (.) as the decimal marker.

In this adopted standard, reference appears to certain International Standards for which Indian Standards also exist. The corresponding Indian Standards which are to be substituted in their places are listed below along with their degree of equivalence for the editions indicated:

<i>International Standard</i>	<i>Corresponding Indian Standard</i>	<i>Degree of Equivalence</i>

Indian Standard

HEXAGON HEAD BOLTS, SCREWS AND NUTS OF PRODUCT GRADES A AND B

PART 6 HEXAGON NUTS, STYLE 2

1 Scope

This International Standard specifies the characteristics of hexagon nuts, style 2, with threads from M5 up to and including M36, with product grade A for threads $d \leq M16$ and product grade B for threads $d > M16$.

If, in special cases, specifications other than those listed in this International Standard are required, they should be selected from existing International Standards, for example ISO 724, ISO 898-2, ISO 965-1 and ISO 4759-1.

NOTE For hexagon nuts style 1, see ISO 4032.

2 Normative references

The following normative documents contain provisions which, through reference in this text, constitute provisions of this International Standard. For dated references, subsequent amendments to, or revisions of, any of these publications do not apply. However, parties to agreements based on this International Standard are encouraged to investigate the possibility of applying the most recent editions of the normative documents indicated below. For undated references, the latest edition of the normative document referred to applies. Members of ISO and IEC maintain registers of currently valid International Standards.

3 Dimensions

See Figure 1 and Table 1.

Symbols and descriptions of dimensions are defined in ISO 225.

- a Washer-face form to be ordered separately
- b $\beta = 15^\circ$ to 30°
- c $\theta = 90^\circ$ to 120°

Finish and/or coating		As processed Requirements for electroplating are covered in ISO 4042. Requirements for non-electrolytically applied zinc flake coatings are covered in ISO 10683. If different electroplating requirements are desired or if requirements are needed for other finishes, they should be agreed between customer and supplier. Limits for surface discontinuities are covered in ISO 6157-2.
Acceptability		For acceptance procedure see ISO 3269.
^a For other property classes see ISO 898-2.		

5 Designation

EXAMPLE

A hexagon nut, style 2, with thread M12 and property class 9 is designated as follows:

Hexagon nut ISO 4033 - M12 - 9

ALTERATION

In clause 5, the designation of hexagon nut, style 2 with thread M12 and property class 9 shall be read as:

'Hexagon nut — IS 1364 (Part 6) /ISO 4033 — M12 - 9' in place of 'Hexagon nut ISO 4033 M12 - 9'.

PACKAGING

The packaging of hexagon nuts shall be in accordance with IS 1367 (Part 18) : 1996 'Industrial fasteners — Threaded steel fasteners — Technical supply conditions : Part 18 Packaging (*third revision*)'.

BIS CERTIFICATION MARKING

Details available with the Bureau of Indian Standards.

For the purpose of deciding whether a particular requirement of this standard is complied with, the final value, observed or calculated, expressing the result of a test or analysis, shall be rounded off in accordance with IS 2 : 1960 'Rules for rounding off numerical values (*revised*)'. The number of significant places retained in the rounded off value should be the same as that of the specified value in this standard.

¹⁾ Since revised in 2000.

²⁾ Since revised in 1995.

Review of Indian Standards

Amendments are issued to standards as the need arises on the basis of comments. Standards are also reviewed periodically; a standard along with amendments is reaffirmed when such review indicates that no changes are needed; if the review indicates that changes are needed, it is taken up for revision. Users of Indian Standards should ascertain that they are in possession of the latest amendments or edition by referring to the latest issue of 'BIS Catalogue' and 'Standards : Monthly Additions'.
